

Moveable clear dome allows you to regulate the access to feed by different sized birds

Squirrel Baffle can be added to prevent squirrels reaching the feeder from the pole

Can also be mounted on top of a Heavy Duty Feeder Pole if nowhere suitable to hang

Mealworm Feed, Squirrel Baffle and Heavy Duty Feeder Pole shown, sold separately and are not supplied

instructions

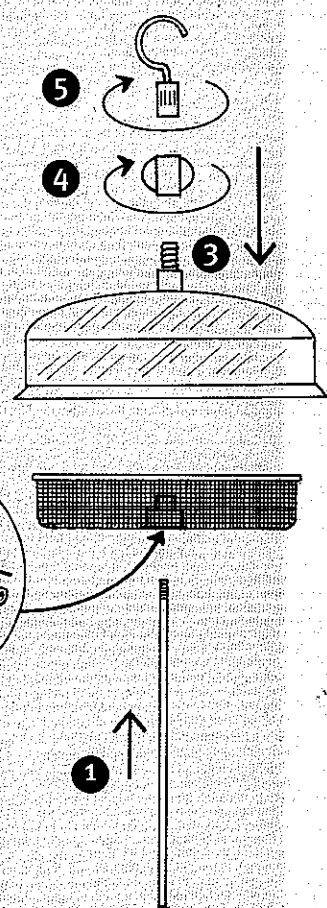

Assemble in the order shown (1-5) in the diagram opposite.

Loosen plastic wing nut to adjust height of clear dome. Tighten plastic wing nut to fix dome at desired height (do not over tighten wing nut as it may get damaged). Reducing the gap between the mesh feed tray and dome will exclude the larger bird species.

Site out of reach of predators.

care

We recommend that you clean your feeder in a mild disinfectant solution once every two months or more often in warm weather. Dis-assemble feeder and remove as much old food and debris as possible. Wash in the solution and thoroughly rinse with clean water. Periodically reposition your feeder to a different area within the garden to avoid an accumulation of unhygienic deposits.
